# Episode of treatment for alcohol and other drugs

# Identifying and definitional attributes

Metadata item type: **Object Class** 

**METEOR** identifier: 268961

**Registration status:** Health, Standard 01/03/2005

Tasmanian Health, Standard 06/12/2023

**Definition:** The period of contact, with defined dates of commencement and cessation,

> between a client and a treatment provider or team of providers in which there is no change in the main treatment type or the principal drug of concern, and there has not been a non-planned absence of contact for greater than three months.

Context: Alcohol and drug treatment services. This concept is required to provide the basis

for a standard approach to recording and monitoring patterns of service utilisation

by clients.

Specialisation of: Service episode

# Collection and usage attributes

Guide for use: A treatment episode must have a defined date of commencement of treatment

episode for alcohol and other drugs and a date of cessation of treatment episode

for alcohol and other drugs.

A treatment episode can have only one main treatment type for alcohol and other drugs and only one principal drug of concern. If the main treatment or principal drug changes then the treatment episode is closed and a new treatment episode is

opened.

A treatment episode may also be considered closed (ceased) if there is a change in the treatment delivery setting or the service delivery outlet. Where the change reflects a substantial alteration in the nature of the treatment episode, for instance where an agency operates in more than one treatment setting (or outlet) they may consider that a change from one setting (or outlet), to another necessitates closure

Is re-engineered from Treatment episode for alcohol and other drugs, version 2,

of one episode and commencement of a new one.

**Collection methods:** Is taken as the period starting from the date of commencement of treatment and

ending at the date of cessation of treatment episode.
