Establishment—number of individual session occasions of service for non-admitted patients (radiology and organ imaging), total N[NNNNNN]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Individual sessions—radiology and organ imaging
Synonymous names:	Type of non-admitted patient care
METEOR identifier:	270510
Registration status:	Health , Standard 01/03/2005
Definition:	The total number of occasions of examination, consultation, treatment or other services provided as individual sessions to non-admitted patients in the radiology and organ imaging functional unit of an establishment.
Data Element Concept:	Establishment—number of individual session occasions of service for non-admitted patients
Value Domain:	Total occasions of service N[NNNNNN]

Value domain attributes

Representational attributes

Representation class:	Total
Data type:	Number
Format:	N[NNNNNN]
Maximum character length:	7
Unit of measure:	Occasion of service

Data element attributes

Collection and usage attributes

Guide for use:

For all occasions of radiology and organ imaging services as individual sessions to non-admitted patients.

Radiology and organ imaging includes services undertaken in radiology (X-ray) departments as well as in specialised organ imaging clinics carrying out ultrasound, computerised tomography (CT) and magnetic resonance imaging (MRI).

This metadata item identifies types of services provided to non-admitted patients in different institutional ways in different systems. It is not a summary casemix classification.

A patient who first contacts the hospital and receives non-admitted care, for example through emergency departments, and is subsequently admitted, should have both components of care enumerated separately. Where possible, non-admitted occasions of service that are provided to patients who are subsequently admitted should be identified as a subset of the total occasions of service.

The list of Type of non-admitted patient care categories was to be developed using typical functional units or cost centres within existing institutions. These would include designated wards or departments and specialised clinics. Although the current statistical/financial returns submitted to the various health authorities by their hospitals do not provide a minimum subset, an effort has been made to define the categories in respect to those areas commonly collected. Many functional units provide services to both admitted patients and non-admitted patients, for example pathology. Only occasions of service for non-admitted patients should be included in this section.
