Address

Important note: This is an archived metadata standard from the AIHW Knowledgebase. For current metadata standards and related information please access METeOR, the AIHW's Metadata Online Registry at http://meteor.aihw.gov.au

Identifying and Definitional Attributes

Data Dictionary: NCSDD

Knowledgebase ID: 000501 Version number: 2

Metadata type: DERIVED DATA ELEMENT

Registration NCSIMG Admin status: SUPERSEDED

Authority: Effective date: 01-SEP-03

Definition: A set of descriptors identifying the geographic location of a person,

organisation, object or place.

Context: Required for primary collection to facilitate contact with the client,

person or service provider.

May also be used to map to the ABS Australian Standard

Geographical Classifications (ASGC) using the National Localities Index (also produced by the ABS). This information can then be used to compare aggregate data to other information of an SLA basis for example. Similarly postcode can be obtained from Address for comparison with other information available on a postcode basis.

See Information Annex 4.3 for further details regarding

Geographical Indicators.

Relational and Representational Attributes

Datatype: Alphanumeric

Representational TEXT

form:

Representation N

layout:

Minimum Size: 0
Maximum Size: 40

Data Domain: NOVAL Concatenation of: Unit number, Number, Street,

City/Town, State/Territory, Postcode, Country

Guide For Use: Multiple addresses may be held. Each address must be attributed

to either one 'Party' or to one 'Party in a role' or to one 'Actual

setting'.

Unit number: Also known as flat number, and floor/level type and number, this is specification of the type of a separately

identifiable portion within a building/complex or marina with it's

associated number or identifier to clearly distinguish it from another.

Number: May refer to a street number where it is the numeric reference of a house or property. Or, it may refer the lot number where a lot number is allocated to an address prior to street numbering. Or, it may refer to a roadside mailbox number (RMB). Street: This should include the full street name to identify the street location.

Administrative Attributes

Source Document: Australian Standard (1999) Interchange of client information. AS

4590.

Source Organisation: Standards Australia

Australian Institute of Health and Welfare

Comments: A complete implementation of Address, including the related data

elements, is currently under development in coordination with Standards Australia, ABS, NHDC and the NCSDC. There are differences in interpretation of what constitutes a person's 'usual' address, if this is required. For example, the Commonwealth State Disability Agreement Minimum Data Set and the National Information Management System for disability employment services specify usual residence as 'residing at this address for at least 4 days of the week'. The ABS Population Census specifies 'Usual address' to be an address that the person has been living in or is likely to live in for at least six months.
