## Specialised mental health service—residual expenditure (academic positions)

## Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 295530

Registration status: Health, Standard 08/12/2004

**Definition:** Expenditures by specialised mental health services that cannot be directly related

to programs operated by a particular organisation or service unit (that is, can only be indirectly related to a particular organisation or service unit). It refers to grants from the organisation, region or state/territory administration to academic institutions for the establishment and maintenance of academic positions in psychiatry or related disciplines. This item also includes the costs of the other academic positions associated with the professional position where these are financed from within the organisation, region or central administration's recurrent

budget.

Context: Specialised mental health service: to improve and substantiate financial reporting

in relation to residual mental health care expenditure and assist in understanding differences in costs for similar specialised mental health service in different states or territories and regions, where these cost differences are due to differences in the extent to which support services and other services to residents/admitted patients

and outpatients of an organisation or service unit may be provided by the organisation or service unit itself or by other bodies

## **Object Class attributes**

### Identifying and definitional attributes

Object class: Specialised mental health service

**Definition:** Specialised mental health services are those with a primary function to provide

treatment, rehabilitation or community health support targeted towards people with a mental disorder or psychiatric disability. These activities are delivered from a service or facility that is readily identifiable as both specialised and serving a

mental health care function.

**Context:** Hospitals and community mental health establishments and residential mental

health establishments.

Specialisation of: Service/care event

#### Collection and usage attributes

Guide for use: The concept of a specialised mental health service is not dependent on the

inclusion of the service within the state or territory mental health budget.

A service is not defined as a specialised mental health service solely because its clients include people affected by a mental disorder or psychiatric disability.

The definition excludes specialist drug and alcohol services and services for people with intellectual disabilities, except where they are established to assist people affected by a mental disorder who also have drug and alcohol related

disorders or intellectual disability.

These services can be a sub-unit of a hospital even where the hospital is not a specialised mental health establishment itself (e.g. designated psychiatric units and

wards, outpatient clinics).

## Property attributes

## Identifying and definitional attributes

Property: Residual expenditure

**Definition:** Expenditure that cannot be directly related to programs operated by a particular

organisation or service unit (that is, can only be indirectly related to a particular

organisation or service unit).

Property group: Financial characteristics

Source and reference attributes

Submitting organisation: National minimum data set working parties
