# Person—need for assistance with activities in a life area, code N

# Identifying and definitional attributes

Metadata item type: Data Element

**Short name:** Assistance with activities

METEOR identifier: 320213

Registration status: Community Services (retired), Standard 16/10/2006

<u>Disability</u>, Standard 13/08/2015 <u>Health</u>, Standard 29/11/2006

**Definition:** The level of help and/or supervision a person requires (or would require if the

person currently helping/supervising was not available) to perform tasks and

actions in a specified life area, as represented by a code.

**Context:** Human functioning and disability

Data Element Concept: Person—need for assistance with activities in a life area

Value Domain: Activity need for assistance code N

#### Value domain attributes

## Representational attributes

Classification scheme: International Classification of Functioning, Disability and Health 2001

Representation class: Code

Data type: Number

Format: N

Maximum character length: 1

**Value** Meaning Permissible values: 0 Does not need help/supervision 1 Sometimes needs help/supervision 2 Always needs help/supervision 3 Unable to do this task or action, even with assistance Supplementary values: 8 Not specified 9 Not applicable

# Collection and usage attributes

Guide for use:

This metadata item contributes to the definition of the concept 'Disability' and gives an indication of the experience of disability for a person.

In the context of health, an activity is the execution of a task or action by an individual. Activity limitations are difficulties an individual may have in executing an activity.

Activity limitation varies with the environment and is assessed in relation to a particular environment; the absence or presence of assistance, including aids and equipment, is an aspect of the environment.

This value domain records the level of a person's need for help or supervision, in a specified domain, in their overall life. This means that the need for assistance may not be directly relevant to the health or community care service being provided.

Where a life area includes a range of examples, (e.g. domestic life includes cooking, cleaning and shopping), if a person requires assistance in any of the areas then the highest level of assistance should be recorded.

Where need for assistance varies markedly over time (e.g. episodic psychiatric conditions) please record the average level of assistance needed.

The presence of an activity limitation with a given domain is indicated by a non-zero response in this value domain. Activity is limited when an individual, in the context of a health condition, either has need for assistance in performing an activity in an expected manner, or cannot perform the activity at all.

CODE 0 is used when the person has no need for supervision or help and can undertake the activity independently.

CODE 1 is used when the person sometimes needs assistance to perform an activity.

CODE 2 is used when the person always needs assistance to undertake the activity and cannot do the activity without assistance.

CODE 3 is used when the person cannot do the activity even with assistance

CODE 8 is used when a person's need for assistance to undertake the activity is unknown or there is insufficient information to use codes 0-3.

CODE 9 is used where the need for help or supervision is due to the person's age. For example, Education for persons less than 5 years and work for persons less than 15 years.
