## Collection and usage attributes

**Guide for use:**

The value domain categories shown above are directly mappable to the narrow sources of cash income specified in the Statistical Concepts Library of the Australian Bureau of Statistics. This is a three level hierarchical classification and is described at the broad (one-digit), narrow (two-digit) and detailed (four-digit) levels.

This value domain uses the two-digit level. Each of the levels may be associated with one or more sub-categories that may be coded at the 4-digit level if desired.

CODE 11 Employee cash income:

Payments from an employer or own limited liability company, including wages or salary, tips, piece rates, penalty rates, loadings, regular bonuses, payment for time not worked (sick leave, recreation leave, public holidays etc.) and director's fees. An employee is classed as receiving cash from an employer or his/her own incorporated enterprise.

CODE 21 [Unincorporated business](#) cash income:

Unincorporated business cash income is net of operating expenses including: labour costs in the form of wages, salaries and supplements; the value of raw materials and services purchased; the repair and maintenance of equipment (including vehicles); the purchase of fuel; indirect taxes; interest paid in connection with the business; and rent paid for buildings and land used in the business. Unincorporated business cash income is also net of depreciation of capital, such as machinery, vehicles and tools used in the business.

CODE 41 Property cash income:

Includes cash income deriving from the ownership of assets; it comprises returns from financial assets (interest, dividend) from physical assets (rent) and from intellectual assets (royalties).

CODE 43 Transfers from private organisations:

Includes payments from workers compensation, insurance companies etc.

CODE 44 Transfers from other households:

Includes payments from such sources as child support payments, gifts from relatives etc.

**Collection methods:**

Please note the differences between this Value domain and the ABS classification (that is, Codes 41, 42, 43, 44, 45 and 49 are mappable to the classification codes 91, 92, 93, 94, 95 and 99. In this value domain code 88 and 99 are supplementary values.).

## Data element attributes

## Collection and usage attributes

**Guide for use:**

All sources of cash income are included in this concept.

Cash income may be received from employment (Employee cash income), as a profit or loss from an unincorporated enterprise ([Unincorporated business](#) cash income), from the ownership of assets (Property cash income). Income may also be derived from current transfers from government (pensions and benefits) or from private sources, such as superannuation funds. An individual may receive cash income from more than one source.

Excluded from this concept is income in kind e.g. barter for goods or services.

**Collection methods:**

If the person has multiple sources of income, all sources should be counted.

This question is not asked of person's aged less than 15 years because they are generally dependants.

While this standard requires collection of data at the 2-digit level, some agencies may wish to collect at the 4-digit level for their own purposes. The 4-digit level is detailed below:
