Birth event—birth method

Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 337672

Registration status: <u>Health</u>, Superseded 12/12/2018

Definition: The method of complete expulsion or extraction from its mother of a product of

conception in a birth event.

Context: Perinatal statistics

Object Class attributes

Identifying and definitional attributes

Object class: Birth event

Definition: The sequence of actions by which a baby and the afterbirth (placenta) are expelled

or extracted from the uterus at childbirth. The process usually starts spontaneously about 280 days after conception with onset of labour, but it may be started by

artificial means.

Specialisation of: <u>Life event</u>

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Origin: University of Oxford 2002. Concise Colour Medical Dictionary 3rd ed. UK: Oxford

University Press
