Pregnancy—estimated duration (at the first visit for antenatal care), completed weeks N[N]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Pregnancy duration at the first antenatal care visit
Synonymous names:	Estimated pregnancy gestation in completed weeks at the first visit for antenatal care.
METEOR identifier:	379597
Registration status:	Health , Superseded 02/08/2017 Indigenous , Superseded 22/10/2018 Tasmanian Health , Superseded 03/07/2020
Definition:	The total number of completed weeks of a pregnancy's estimated duration on the day of the first visit for antenatal care.
Data Element Concept:	Pregnancy—estimated duration
Value Domain:	Total weeks N[N]

Value domain attributes

Representational attributes

Representation class:	Total	
Data type:	Number	
Format:	N[N]	
Maximum character length:	2	
	Value	Meaning
Supplementary values:	99	Not stated/unknown
Unit of measure:	Completed weeks	

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
---------------------------------	--------------------------------------------

Data element attributes

Collection and usage attributes

Guide for use:	<p>The day of the first visit for antenatal care is the day of the first contact with a midwife, medical practitioner, or other recognised health professional where antenatal care was provided. It does not include a contact if it was to confirm the pregnancy only or those contacts that occurred during the pregnancy that related to other non pregnancy related issues. It does not include a first contact after the onset of labour.</p> <p>Antenatal care visits are attributed to the pregnant woman. The duration of the pregnancy on that day is the same as the gestational age of the fetus or baby on that day.</p>
-----------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Collection methods: To be collected at any time during the pregnancy or birth episode after the best estimate of gestational age has been determined.

The method of data collection will usually be from health records of pregnancy and/or birth.

The valid range of completed weeks for Pregnancy duration at the first visit for antenatal care is 3–46.
