National Healthcare Agreement: P12-Bowel cancer screening rates, 2010

Identifying and definitional attributes

Metadata item type: Indicator

Indicator type: Output measure

Short name: Bowel cancer screening rates, 2010

METEOR identifier: 394292

Registration status: Health, Superseded 08/06/2011

Description: Screening rates for bowel cancer for people within national target groups.

Indicator set: National Healthcare Agreement (2010)

Health, Superseded 08/06/2011

Outcome area: Prevention

Health, Standard 07/07/2010

Data quality statement: National Healthcare Agreement: P12-Bowel cancer screening rates, 2010 QS

Health, Superseded 08/06/2011

Collection and usage attributes

Population group age

from:

Population aged 50, 55 and 65 years

Computation description: Rates are age-specific and expressed per 100 persons.

Computation: 100 × (Numerator ÷ Denominator)

Numerator: Number of persons aged 50, 55 and 65 years who completed a faecal occult blood

test supplied by the National Bowel Cancer Screening Program in the reference

calendar year.

Numerator data elements: Data Element / Data Set

Data Element

Person—person identifier

Data Source

National Bowel Cancer Screening Program (NBCSP)

Guide for use

Data source type: Administrative by-product data

The numerator only includes those people who were screened through the

National Bowel Cancer Screening Program (NBCSP).

Denominator: Population aged 50, 55 and 65 years

Denominator data elements:

Data Element / Data Set

Data Element

Person—estimated resident population of Australia

Data Source

ABS Estimated resident population (total population)

Guide for use

Data source type: Census-based plus administrative by-product data

Data Element / Data Set-

Data Element

Comments:

Specified disaggregation: Nationally and by state/territory: by age/sex, Indigenous status, remoteness area and SEIFA of residence.

Available disaggregation: Nationally and by state/territory: by age/sex; Nationally: by remoteness area and SEIFA of residence.

Data for 2009 will be available by mid-2010.

Most recent data available for 2010 CRC baseline report: 2008

Accountability attributes

Reporting requirements: National Healthcare Agreement

Organisation responsible

for providing data:

Australian Institute of Health and Welfare

Further data development / Specification: Interim collection required:

A National Bowel Cancer Dataset (i.e. data dictionary) is under development.

The quality of Indigenous identification needs to be assessed.

Explore how to identify people who are screened outside the National Bowel

Cancer Screening Program.

Other issues caveats:

Indigenous status is self-reported by participating individuals.

Remoteness area and SEIFA of residence are based on postcode of residential

address at the time of screening.

Lack of inclusion of people screened outside the National Bowel Cancer Screening Program will result in an underestimate of the population screening rates in the

target age groups.

Disaggregation by Indigenous status, remoteness area and SEIFA of residence

within individual states/territories is subject to data quality considerations.

The bowel cancer screening program is guaranteed until 2010. The program is

expected to expand to more age groups on a rolling basis.

The National Bowel Cancer Screening Program was suspended in May 2009 due

to unreliable screening kits, subsequently resuming in November 2009.
