Sex of prison entrants cluster

Exported from METEOR (AIHW's Metadata Online Registry)

Sex of prison entrants cluster

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	412252
Registration status:	Health, Superseded 28/04/2016
DSS type:	Data Element Cluster
Scope:	These data elements are used in conjunction with each other to describe the number of male and female prison entrants into a prison during the National Prisoner Health Census period.

Collection and usage attributes

Guide for use:	The Sex of prison entrants cluster comprises two data elements which allow data on the number of male and female prison entrants into a prison during the National Prisoner Health Census period to be determined.
	This is achieved by the combination of the two data elements: *Establishment (prison)—number of prison entrants, number N[NN]* and *Person—sex, code N*.
	The Sex of prison entrants cluster describes the following information:

Sex	Number of prison entrants
Male	N[NN]
Female	N[NN]

Comments:	The number and sex of prisoners entering Australia's prisons during the National Prisoner Health Census period will be used to derive statistics on the demographic characteristics of prison entrants.
