Dwelling file cluster (Indigenous community housing)

Exported from METEOR (AIHW's Metadata Online Registry)

Dwelling file cluster (Indigenous community housing)

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	480533
Registration status:	Housing assistance, Superseded 01/05/2013
DSS type:	Data Element Cluster
Scope:	Indigenous community housing (ICH) for the purpose of this collection includes dwellings:

- managed by Indigenous Community Housing Organisations (ICHO) who received funding both in the current and/or previous financial years; and
- targeted to Indigenous people.

A principle of the ICHO must be to provide medium- to long-term housing tenure to tenants.

This collection excludes dwellings managed under:

- mainstream community housing (i.e. not managed by an ICHO)
- public rental housing
- state owned and managed Indigenous housing (SOMIH)
- the Crisis Accommodation Program (CAP).

Collection and usage attributes

Statistical unit:	Dwellings and Households
Collection methods:	Commonwealth, state and territory governments provide the data to the Australian Institute of Health and Welfare for national collation on an annual basis.

Metadata items in this Data Set Specification

Seq No.	Metadata item	Obligation	Max occurs
-	Dwelling address details cluster	Mandatory	1
-	Address—geocode latitude, decimal degrees XN[N][.N(9)]	Mandatory	1

DSS specific information:

Unknown values are recorded as "U".

Seq No.	Metadata item	Obligation	Max occurs
-	Address—geocode longitude, decimal degrees XN[NN][.N(9)]	Mandatory	1

DSS specific information:

Unknown values are recorded as "U".

Seq No.	Metadata item	Obligation	Max occurs
-	Address—location descriptor, text X[X(49)]	Mandatory	2
-	Dwelling—address line, text [X(180)]	Mandatory	1
-	Dwelling—Australian postcode code (Postcode datafile) {NNNN}	Mandatory	1

DSS specific information:

Unknown values are recorded as "U".

Seq No.	Metadata item	Obligation	Max occurs
-	Dwelling—Australian state/territory identifier, code N	Mandatory	1
-	Dwelling—geographic remoteness, classification (ASGC-RA) N	Mandatory	1

DSS specific information:

Unknown values are recorded as "U".

Seq No.	Metadata item	Obligation	Max occurs
-	Dwelling—suburb/town/locality name, text [A(50)]	Mandatory	1
-	Indigenous community housing dwelling occupancy status cluster	Mandatory	0

DSS specific information:

The current standards for dwelling occupancy and tenantability status have been added to this data set, to align the Indigenous community housing collection with other housing collections.

An alternative code set is used by the collection, which accounts for most values in the standard items. The alternative codeset and mapping is as follows:

ICH label and value	METeOR standard label and value
1 = Occupied	1 = Yes (Occupied) [Occupancy standard]
2 = Untentantable	2 = No (Untenantable) [Tenantability standard]
0 = Unoccupied	2 = No (Not Occupied) [Occupancy standard]
N/A	1 = Yes (Tenantable) [Tenantability standard]
U = Unknown	9 = Not stated/Inadequately described [Occupancy and Tenantability standards]

The Indigenous community housing code set excludes the collection of dwellings which are 'tenantable'. Dwellings identified as unoccupied according to the the ICH data manual, should by default be considered tenantable. Dwellings identified as occupied according to the the ICH data manual, may or may not be considered tenantable.

Seq No.	Metadata item	Obligation	Max occurs
-	Dwelling—occupancy status, code N	Mandatory	1
-	Dwelling—tenantability status, code N	Mandatory	1
-	Dwelling—dwelling identifier, X[X(14)]	Mandatory	1

Seq No.	Metadata item	Obligation	Max occurs
-	[Dwelling—number of bedrooms, total N[NN]](#)	Mandatory	1

DSS specific information:

Unknown values (code = "U") should be mapped to Not stated/Inadequately described (code = "999").

-	[Dwelling—number of households, total N[N]](#)	Mandatory	1

DSS specific information:

Unknown values (code = "U") should be mapped to Not stated/Inadequately described (code = "99").

-	[Dwelling—number of occupants, total N[N]](#)	Mandatory	1

DSS specific information:

Unknown values (code = "U") should be mapped to Not stated/Inadequately described (code = "99").

-	[Dwelling—occupancy status, code N](#)	Mandatory	1

DSS specific information:

Unknown values (code = "U") should be mapped to Not stated/Inadequately described (code = "9").

-	[Dwelling—permanency status, code N](#)	Mandatory	1

DSS specific information:

In the Indigenous Community Housing 2011-12 collection the codeset was recorded with alternate values, and should be mapped to the values in the table below.

METeOR value	METeOR label	ICH value
1	Permanent	1
2	Improvised	0
9	Not state/Inadequately described	U

-	[Dwelling—tenancy management status, code N](#)	Mandatory	1
-	[Dwelling—tenantability status, code N](#)	Mandatory	1

DSS specific information:

Unknown values (code = "U") should be mapped to Not stated/Inadequately described (code = "9").

Seq No.	Metadata item	Obligation	Max occurs
-	[Service provider organisation—organisation identifier, X[X(14)]](#)	Mandatory	1

DSS specific information:

In community housing data collections the identifier should be reported by each community housing provider in conjunction with data collected as part of their reporting requirements each financial year. The identifier may only be unique within the state or territory and may be allocated by community housing providers, the state or territory housing authority or the state or territory community housing administrator.
