Birth event—analgesia administered indicator

Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 495376

Registration status: Health, Superseded 12/12/2018

Definition: An indicator of whether <u>analgesia</u> was administered to the woman during a birth

event.

Context: Perinatal statistics

Object Class attributes

Identifying and definitional attributes

Object class: Birth event

Definition: The sequence of actions by which a baby and the afterbirth (placenta) are expelled

or extracted from the uterus at childbirth. The process usually starts spontaneously about 280 days after conception with onset of labour, but it may be started by

artificial means.

Specialisation of: <u>Life event</u>

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Origin: University of Oxford 2002. Concise Colour Medical Dictionary 3rd ed. UK: Oxford

University Press

Property attributes
