Address—electronic communication medium, code N[N]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Electronic communication medium
Synonymous names:	Electronic communication type
METEOR identifier:	522584
Registration status:	Health , Standard 05/10/2016 Indigenous , Standard 16/10/2017
Definition:	The type of mechanism used for electronic communication with an entity, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Address—electronic communication medium
METEOR identifier:	522580
Registration status:	Health , Standard 05/10/2016 Indigenous , Standard 16/10/2017
Definition:	The type of mechanism used for electronic communication with an entity.
Object class:	Address
Property:	Electronic communication medium

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
Reference documents:	Standards Australia 2014. AS 4846:2014 Person and provider identification in healthcare. Sydney: Standards Australia.

Value domain attributes

Identifying and definitional attributes

Value domain:	Electronic communication medium code N[N]
METEOR identifier:	522582
Registration status:	Health , Standard 05/10/2016 Indigenous , Standard 16/10/2017
Definition:	A code set representing types of electronic communication mechanisms.

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N[N]
Maximum character length:	2

Value	Meaning
-------	---------

Permissible values:	1	Telephone (excluding mobile telephone)
	2	Mobile (cellular) telephone
	3	Facsimile machine
	4	Pager
	5	Email
	6	Uniform Resource Identifier (URI)
	7	Instant messaging
	8	Teletypewriter (TTY)
	88	Other

Collection and usage attributes

Guide for use:	CODE 1 Telephone (excluding mobile telephone)
	Includes the telephone number and area code. This is usually recorded without spaces, although it may be displayed with spaces. A country code must be added if this field is to include international numbers.
	CODE 2 Mobile (cellular) telephone
	Includes the telephone number and area code. This is usually recorded without spaces, although it may be displayed with spaces. This is a special type of phone number often used for purposes different to those for which a conventional phone number is used. This number may be used for SMS-based automated communications.
	CODE 3 Facsimile machine
	Includes the telephone number and area code to be used to send facsimile communications to this individual or organisation.
	CODE 4 Pager
	Includes the number and details required for pager communication with an individual.
	CODE 5 Email
	Includes the email address of the individual or organisation.
	CODE 6 Uniform Resource Identifier (URI)
	Includes the social networking page identifier or website address.
	CODE 7 Instant messaging
	Includes voice over Internet Protocol (VoIP) or Skype addresses.
	CODE 8 Teletypewriter
	Includes electronic communication media used by the blind and deaf community.
