Healthcare provider qualification and registration cluster

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	522900
Registration status:	Health, Standard 05/10/2016
DSS type:	Data Element Cluster
Scope:	The Healthcare provider qualification and registration cluster contains data elements that define the additional information needed to represent a **healthcare provider**. This includes information about the provider's professional registration, field(s) of practice, any practice limitations and practice details.
	This cluster supports the identification of individual healthcare providers in healthcare systems generally, but also supports professional registration. The data elements within the cluster are contained in the practitioners' public register and form part of the unique identification of individual healthcare providers.
	This cluster is not intended to be the basis for collecting exhaustive details of registered qualifications or experience.
