# Child—initial health check conducted indicator, yes/no/not applicable/not stated/inadequately described code N

## Identifying and definitional attributes

|                              |   |
|------------------------------|---|
| <b>Metadata item type:</b>   | Data Element  |
| <b>Short name:</b>           | Initial health check conducted indicator  |
| <b>METEOR identifier:</b>    | 529681  |
| <b>Registration status:</b>  | <a href="#">Children and Families</a> , Standard 22/11/2016<br><a href="#">Community Services (retired)</a> , Recorded 16/10/2014 |
| <b>Definition:</b>           | An indicator of whether a child underwent an <a href="#">initial health check</a> , as represented by a code.                     |
| <b>Data Element Concept:</b> | <a href="#">Child—initial health check conducted indicator</a>  |
| <b>Value Domain:</b>         | <a href="#">Yes/no/not applicable/not stated/inadequately described code N</a>  |

## Value domain attributes

### Representational attributes

|                                  |              |                                   |
|----------------------------------|--------------|-----------------------------------|
| <b>Representation class:</b>     | Code         |                                   |
| <b>Data type:</b>                | Number       |                                   |
| <b>Format:</b>                   | N            |                                   |
| <b>Maximum character length:</b> | 1            |                                   |
|                                  | <b>Value</b> | <b>Meaning</b>                    |
| <b>Permissible values:</b>       | 1            | Yes                               |
|                                  | 2            | No                                |
| <b>Supplementary values:</b>     | 7            | Not applicable                    |
|                                  | 9            | Not stated/inadequately described |

## Data element attributes

### Collection and usage attributes

|                            |  |
|----------------------------|--|
| <b>Guide for use:</b>      | <p>CODE 1 Yes</p> <p>Use if the child had an initial health check.</p> <p>CODE 2 No</p> <p>Use if the child did not have an initial health check.</p> <p>CODE 7 Not applicable</p> <p>Use if the child was not required to have an initial health check.</p> <p>CODE 9 Not stated/inadequately described</p> <p>Use if it was unknown if the child had an initial health check (e.g. due to data quality).</p>   |
| <b>Collection methods:</b> | <p>If the child was required to have an initial health check during the reference period (i.e. code 1 was recorded for 'initial health check required indicator'), code 1, 2 or 9 should be recorded for this item. Code 9 should be recorded only if it was unknown whether a health check was required during the reference period (e.g. due to data quality).</p> <p>If code 2, 7 or 9 was recorded for <a href="#">Child—initial health check required indicator, yes/no/not applicable/not stated/inadequately described code N</a>, code 7 should be recorded for this item.</p>   |
| <b>Comments:</b>           | <p>Record only for children admitted to the care of the Minister/Chief Executive during the reporting period.</p> <p>Children admitted to care includes all children admitted to the care of the Minister/Chief Executive for the first time during the reporting period, as well as children returning to the care of the Minister/Chief Executive after exiting more than 60 days previously. Children with an ongoing care arrangement from a previous reporting period are not counted as being admitted to care in the current reporting period.</p> <p>Children admitted to the care of the Minister/Chief Executive more than once during the reporting period should be recorded only once in the National out-of-home care standards (NOOHCS) file, irrespective of the number of times they were admitted.</p> <p>Health check items should be reported for the first admission during the current reporting period.</p> |
