Performance and Accountability Framework (PAF)

Identifying and definitional attributes

Item type:	Framework Dimension
METEOR identifier:	554919
Description:	<p>The August 2011 Council of Australian Governments (COAG) National Health Reform Agreement (NHRA) outlined COAG's objectives for national health reform, including:</p> <ul style="list-style-type: none">• improving performance reporting through the establishment of the National Health Performance <p>Authority (the Authority); and</p> <ul style="list-style-type: none">• improving accountability through the Performance and Accountability Framework (the Framework). <p>The NHRA builds on the Heads of Agreement – National Health Reform agreed by COAG in February 2011.</p> <p>The Framework is designed to support improved local level performance assessment to contribute towards the achievement of these objectives.</p> <p>The key objective of the Framework is to support a safe, high quality Australian health system, through improved transparency and accountability.</p> <p>A robust performance reporting framework is critical to ensuring extensive information is available for patients and clients, health providers, and health system managers.</p> <p>The Framework will underpin reporting across three domains – equity, effectiveness and efficiency of service delivery in health care.</p> <p>By publicly and transparently reporting on these domains of health system performance, the Framework will help to drive improvements in health system delivery and hence the achievement of broader health system objectives.</p>

Dimensions of this framework

• [PAF-Effectiveness](#)

Identifying and definitional attributes

Item type:	Framework Dimension
METEOR identifier:	554925
Description:	<p>Effectiveness indicators measure how well the outputs of a service achieve the stated objectives of that service. The reporting framework groups effectiveness indicators according to characteristics that are considered important to the service. These characteristics include access, appropriateness and/or quality.</p>

Indicators in this framework

- [National Health Performance Authority, Healthy Communities: Life expectancy, 2009–2011](#)
National Health Performance Authority (retired), Retired 01/07/2016
- [National Health Performance Authority, Healthy Communities: Number of selected potentially avoidable hospitalisations per 100,000 people, 2011–12](#)
National Health Performance Authority (retired), Retired 01/07/2016
- [National Health Performance Authority, Healthy Communities: Potentially avoidable deaths, 2009–2011](#)
National Health Performance Authority (retired), Retired 01/07/2016

- [National Health Performance Authority Healthy Communities: Percentage of women who gave birth and smoked during pregnancy, 2007–2011](#)
National Health Performance Authority (retired), Retired 01/07/2016
- [National Health Performance Authority Healthy Communities: Infant mortality rate, 2010–2012](#)
National Health Performance Authority (retired), Retired 01/07/2016
- [National Health Performance Authority Healthy Communities: Percentage of women who gave birth and had at least one antenatal visit in the first trimester, 2010–2011](#)
National Health Performance Authority (retired), Retired 01/07/2016
- [National Health Performance Authority Healthy Communities: Percentage of live singleton births that were of low birthweight, 2007–2011](#)
National Health Performance Authority (retired), Retired 01/07/2016
- [National Health Performance Authority Healthy Communities: Infant and young child mortality rate, 2010–2012](#)
National Health Performance Authority (retired), Retired 01/07/2016

Sub-dimensions of this framework

- [PAF-Appropriateness](#)

Identifying and definitional attributes

Item type:	Framework Dimension
METEOR identifier:	554929
Description:	NO FURTHER DESCRIPTION IN THE PAF.

- [PAF-Effectiveness of access](#)

Identifying and definitional attributes

Item type:	Framework Dimension
METEOR identifier:	554928
Description:	Access indicators can be used to measure equity of service provision where data is compared across localities. However, access is also an important, absolute measure of LHN and hospital performance.

Indicators in this framework

- [National Health Performance Authority, Hospital Performance: Number of surgeries for malignant cancer, 2011-12](#)
National Health Performance Authority (retired), Superseded 02/10/2014
- [National Health Performance Authority, Healthy Communities: Number of selected potentially avoidable hospitalisations per 100,000 people, 2011–12](#)
National Health Performance Authority (retired), Retired 01/07/2016
- [National Health Performance Authority, Hospital Performance: Median waiting time for elective surgery 2011-12](#)
National Health Performance Authority (retired), Superseded 28/05/2014
- [National Health Performance Authority, Hospital Performance: Median waiting time for elective surgery 2012-13](#)
National Health Performance Authority (retired), Retired 01/07/2016
- [National Health Performance Authority, Hospital Performance: Number of elective surgeries 2011-12](#)
National Health Performance Authority (retired), Superseded 25/07/2013
- [National Health Performance Authority, Hospital Performance: Patients who received their surgery within clinically recommended times 2011-12](#)
National Health Performance Authority (retired), Superseded 28/05/2014

METEOR identifier:	554931
Description:	NO FURTHER DESCRIPTION IN THE PAF.

• [PAF-Efficiency](#)

Identifying and definitional attributes

Item type:	Framework Dimension
METEOR identifier:	554926
Description:	Efficiency indicators (the relationship of inputs to outputs) measure how efficiently the outputs of a service were achieved. Technical efficiency indicators measure how well services use their resources (inputs) to produce outputs. Government funding per unit of output delivered is a typical indicator of technical efficiency. Allocative efficiency considers the use of resources across different care/treatment domains and strategic options, including in hospitals and primary care settings. Whilst indicators of allocative efficiency are not currently well developed in health care, they will be a focus for future development.

Indicators in this framework

- [National Health Performance Authority, Healthy Communities: Expenditure on specialist attendances, 2011–12](#)
[National Health Performance Authority \(retired\)](#), Superseded 27/03/2014
- [National Health Performance Authority, Healthy Communities: Expenditure on specialist attendances, 2012–13](#)

[National Health Performance Authority \(retired\)](#), Retired 01/07/2016

• [PAF-Equity](#)

Identifying and definitional attributes

Item type:	Framework Dimension
METEOR identifier:	554920
Description:	Equity indicators measure how well a service meets the requirements of particular groups in society with special needs. Indicators may reflect both equity of access, whereby all Australians are expected to have adequate access to services, and equity of outcome, whereby all Australians are expected to achieve similar outcomes arising from service use.

Sub-dimensions of this framework

- [PAF-Equity of access](#)

Identifying and definitional attributes

Item type:	Framework Dimension
METEOR identifier:	554927
Description:	Access indicators can be used to measure equity of service provision where data is compared across localities. However, access is also an important, absolute measure of LHN and hospital performance.

Indicators in this framework

- [National Health Performance Authority, Healthy Communities: Cost barriers to GP care, 2011–12](#)
[National Health Performance Authority \(retired\)](#), Superseded 19/03/2015
- [National Health Performance Authority, Hospital Performance: Number of surgeries for malignant cancer, 2011-12](#)
[National Health Performance Authority \(retired\)](#), Superseded 02/10/2014
