Maternity model of care—midwifery caseload indicator, yes/no code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Midwifery caseload indicator
Synonymous names:	Midwifery group practice; Midwifery continuity of carer
METEOR identifier:	558582
Registration status:	Health , Standard 14/05/2015
Definition:	An indicator of whether a model of maternity care is a midwifery caseload model of care, as represented by a code.
Context:	Used in maternal and perinatal healthcare settings.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Maternity model of care—midwifery caseload indicator
METEOR identifier:	558580
Registration status:	Health , Standard 14/05/2015
Definition:	An indicator of whether a model of maternity care is a midwifery caseload model of care.
Object class:	Maternity model of care
Property:	Midwifery caseload indicator

Source and reference attributes

Submitting organisation:	National Perinatal Epidemiology and Statistics Unit
Origin:	National Maternity Data Development Project (AIHW & NPESU), Maternity Care Classification System subproject.

Value domain attributes

Identifying and definitional attributes

Value domain:	Yes/no code N
METEOR identifier:	270732
Registration status:	Australian Institute of Health and Welfare , Recorded 09/08/2023 Australian Teacher Workforce Data Oversight Board , Standard 30/08/2022 Community Services (retired) , Standard 27/04/2007 Disability , Standard 07/10/2014 Early Childhood , Standard 21/05/2010 Health , Standard 01/03/2005 Homelessness , Standard 23/08/2010 Housing assistance , Standard 23/08/2010 Independent Hospital Pricing Authority , Standard 01/11/2012 Indigenous , Standard 16/09/2014 National Health Performance Authority (retired) , Retired 01/07/2016 Tasmanian Health , Standard 27/05/2020 WA Health , Standard 19/03/2015
Definition:	A code set representing 'yes' and 'no'.

Representational attributes

Representation class: Code
Data type: Boolean
Format: N
Maximum character length: 1

	Value	Meaning
Permissible values:	1	Yes
	2	No

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use: CODE 1 Yes

This code is to be used only if the model of care is midwifery caseload. This involves a midwife having a set number of women per month or per annum (full-time equivalent) for whom they are the primary midwife, providing and coordinating the majority of care throughout pregnancy, labour and after birth and acting as a backup midwife for another primary midwife. The primary midwife is usually on-call for 24 hours per day for a set period and is often paid on an annualised salary and not on shifts. This is different to team midwifery.

CODE 2 No

This code is to be used for all other models of care, including team midwifery. Although a team midwifery model may look after a set number of women per year, this number is shared among the team rather than having each midwife act as primary midwife for their own caseload of women.

Collection methods: Data are gathered using the Maternity Care Classification System (MaCCS) data collection questionnaire on an annual basis by every maternity service when classifying their models of care or when a new model of care is introduced.
