Maternity model of care—postnatal visits in a residential setting indicator, yes/no code N

Exported from METEOR (AIHW's Metadata Online Registry)

Maternity model of care—postnatal visits in a residential setting indicator, yes/no code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Postnatal visits in a residential setting
Synonymous names:	Postnatal home visits; Domiciliary postnatal visits
METEOR identifier:	558729
Registration status:	Health, Standard 14/05/2015
Definition:	An indicator of whether a model of maternity care provides postnatal visits in a residential setting, as represented by a code.
Context:	Used in maternal and perinatal healthcare settings.
Data Element Concept:	Maternity model of care—postnatal visits in a residential setting indicator
Value Domain:	Yes/no code N

Value domain attributes

Representational attributes

Representation class:	Code	
Data type:	Boolean	
Format:	N	
Maximum character length:	1	
	Value	**Meaning**
Permissible values:	1	Yes
	2	No

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use:	CODE 1 Yes This code is to be used if a model of maternity care provides women with access to postnatal visits by a maternity care health professional in a residential setting such as the woman's own home, a hotel or hostel. These visits may be provided by the designated maternity carer who has provided care throughout the antenatal and/or intrapartum period or the visits may be provided as part of a "domiciliary" or "early discharge" midwifery home visiting program. CODE 2 No This code is to be used if a model of maternity care does not provide women with postnatal care in a residential setting and postnatal visits are only provided in a hospital, clinicians' private rooms or a community/healthcare facility following discharge from the birth setting.

Collection methods: Data are gathered using the Maternity Care Classification System (MaCCS) data collection questionnaire on an annual basis by every maternity service when classifying their models of care or when a new model of care is introduced.
