# National Healthcare Agreement: PI 07-Infant and young child mortality rate, 2015

# Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Progress measure
Short name:	PI 07-Infant and young child mortality rate, 2015
METEOR identifier:	559054
Registration status:	Health, Superseded 08/07/2016
Description:	Mortality rates for infants and children aged less than 5 years.
Indicator set:	National Healthcare Agreement (2015) Health, Superseded 08/07/2016
Outcome area:	Prevention <u>Health</u> , Standard 07/07/2010
Data quality statement:	National Healthcare Agreement: PI 07-Infant and young child mortality rate, 2015 QS Health, Superseded 08/07/2016

# Collection and usage attributes

Population group age from:	<ul> <li>This indicator uses a number of different population gro</li> <li>For infants: Less than 1 year of age</li> <li>For children aged 1-4 years: 1 year of age</li> <li>For children aged 0-4 years: Less than 1 year of age</li> </ul>	up age lower bounds:
Population group age to:	<ul> <li>This indicator uses a number of different population gro</li> <li>For infants: Less than 1 year of age</li> <li>For children aged 1-4 years: Less than 5 years of age</li> <li>For children aged 0-4 years: Less than 5 years of age</li> </ul>	9
Computation:	<u>Infants (&lt;1 year old)</u> : 1,000 x (Numerator ÷ Denominato <u>Children (0–4 year olds)</u> : 100,000 x (Numerator ÷ Deno	
	Calculated separately for each of the two age groups, a Indigenous and non-Indigenous Australians.	nd for all Australians,
	Variability bands are to be calculated for single-year rat state/territory using the following method for estimating	
	CI (CR) = CR ± 1.96 x (CR/√d)	
	Where d = number of deaths	
	CI = confidence interval	
	CR = crude rate	
	Presented as:	
	<ul> <li>number of deaths per 1,000 live births (infant)</li> <li>number of deaths per 100,000 population (child).</li> </ul>	
	Rate ratios and rate differences are calculated for comp Indigenous Australians. The rates for a single year uses numerator, and the average of three years (with the refe year) for the denominator. The rates for 5 years of data of 5 years data for the numerator and denominator.	single year data for the rence year as the middle
Numerator:	<ul> <li>Number of deaths among infants (aged &lt; 1 year).</li> <li>Number of deaths among children aged 0–4 years.</li> </ul>	
data 550051	Daga 2 of 9	Downloaded 09 May

Person—age, total years N[NN]

Data Source

ABS Death Registrations Collection

Guide for use

Data source type: Administrative by-product data

Denominator:

• Number of live births; and

• Population aged 0–4 years.

# Denominator data elements:

#### -Data Element / Data Set

#### Data Element

Person-estimated resident population of Australia

#### Data Source

ABS Estimated resident population (total population)

#### Guide for use

Data source type: Census-based plus administrative by-product data Used for the denominator for the mortality rate for children aged 1-4 years, and as a component of the denominator for the mortality rate for children aged 0-4 years.

#### - Data Element / Data Set-

#### Data Element

Person-estimated resident population of Australia

Data Source

ABS Census of Population and Housing Post-Enumeration Survey

Guide for use

Data source type: Census-based plus administrative by-product data

#### - Data Element / Data Set-

#### Data Element

Person-estimated resident population of Australia

Data Source

ABS Indigenous estimates and projections

#### Guide for use

Data source type: Census-based plus administrative by-product data Used for the denominator for the mortality rate for Indigenous children aged 1-4 years, and as a component of the denominator for the mortality rate for Indigenous children aged 0-4 years.

#### - Data Element / Data Set-

Birth—birth status, code N

#### Data Source

#### ABS birth registration data

#### Guide for use

Data source type: Administrative by-product data Used as the main component of the denominator for the infant mortality rate. Include live births only, i.e. value = 1.

Disaggregation:	2011–13—State and territory.
	2009–13—State and territory, by Indigenous status.
	2013—Nationally.
	2007, 2008, 2009, 2010, 2011, 2012 (resupplied for children aged 0-4 years for updated Indigenous Estimated Resident Population), 2013—Nationally, by Indigenous status.
	2012—Nationally, by remoteness (0-4 years only) (Major Cities, Inner and Outer Regional combined, Remote and Very remote combined).
	Some disaggregations may result in numbers too small for publication. Disaggregation by Indigenous status will be based on data only from jurisdictions for which the quality of Indigenous identification is considered acceptable - NSW, Qld, WA, SA and NT.

	Data source type: Administrative by-product data
	Used for disaggregation by state/territory and remoteness

Comments:

Most recent data available for 2015 National Healthcare Agreement (NHA) performance reporting:

- 2013 (released Nov 2014)
- 2011-13 (Total population)
- 2009–2013 (Indigenous status).

Because of small numbers of deaths each year data are presented in 3 (total population) or 5-year (Indigenous population) groupings (state and territory only).

Single year data will be reported for time series analysis (national level only).

A system error affected the reporting of WA Aboriginal and Torres Strait Islander death registrations for 2007, 2008 and 2009 which affected the WA and national death rates reported for the 2011 and 2012 CRC reports. These data have been revised for 2013 reporting.

Data by remoteness may be available, pending assessment of data quality.

Further details (including historical data) are available from the Aboriginal and Torres Strait Islander Health Performance Framework (Indicator 1.20).
