Valid National Bowel Cancer Screening Program (NBCSP) screening test

Identifying and definitional attributes

Metadata item type: Glossary Item

METEOR identifier: 569116

Registration status: [Health](#), Standard 29/08/2014

Definition: A valid National Bowel Cancer Screening Program (NBCSP) screening test is one where the testing kit has been correctly completed by the screening program participant.

Valid NBCSP screening tests include [faecal occult blood test](#) (FOBT) kits where:

- the participant returned both of the required samples
- the completed testing kit had not expired
- the two samples were collected within 14 days of each other
- the completed testing kit was returned within 14 days of the date of collection of the first sample.

Invalid NBCSP screening tests include FOBT kits where:

- the participant only returned one of the two samples
- the completed testing kit had expired
- there was a gap of more than 14 days between the dates on which the two samples were collected
- there were more than 14 days between the date of the first sample and the arrival of the completed testing kit at the pathology laboratory.
