# National Mental Health Performance Framework

## Identifying and definitional attributes

**Item type:** Framework Dimension

**METEOR identifier:** 584825

**Description:** The National Mental Health Performance Framework has been superseded by [National Mental Health Performance Framework 2020](#).

The National Mental Health Performance Framework (NMHPF) was developed in 2005 as a key strategy for facilitating a culture of continuous quality improvement in mental health service delivery. The framework supports Australian and state and territory governments' commitment to improving accountability and transparency at the Mental Health Service Organisation (MHSO) level.

The NMHPF follows the tier and structure domain of the National Health Performance Framework (NHPF). The three tiers of performance are as follows:

## Dimensions of this framework

- [Tier I-Health Status and Outcomes](#)

### Identifying and definitional attributes

**Item type:** Framework Dimension

**METEOR identifier:** 584828

**Description:** How healthy are Australians? Is it the same for everyone? Where is the most opportunity for improvement?

### Sub-dimensions of this framework

- [Deaths](#)

#### Identifying and definitional attributes

**Item type:** Framework Dimension

**METEOR identifier:** 584829

**Description:** Age or condition specific mortality rates.

- [Health Conditions](#)

#### Identifying and definitional attributes

**Item type:** Framework Dimension

**METEOR identifier:** 584847

**Description:** Prevalence of disease, disorder, injury or trauma or other health-related states

- [Human Function](#)

#### Identifying and definitional attributes

**Item type:** Framework Dimension

**METEOR identifier:** 584844

**Description:** Alterations to body, structure or function (impairment), activities (activity limitation) and participation (restrictions in participation)

- [Life Expectancy & Wellbeing](#)

### Identifying and definitional attributes

**Item type:** Framework Dimension

**METEOR identifier:** 584843

**Description:** Broad measures of physical, mental, and social wellbeing of individuals and other derived indicators such as Disability Adjusted Life Expectancy (DALE)

- [Tier II-Determinants of Health](#)

### Identifying and definitional attributes

**Item type:** Framework Dimension

**METEOR identifier:** 584850

**Description:** Are the factors determining health changing for the better? Is it the same for everyone? Where and for whom are they changing for the worse?

#### Sub-dimensions of this framework

- [Community Capacity](#)

### Identifying and definitional attributes

**Item type:** Framework Dimension

**METEOR identifier:** 584855

**Description:** Characteristics of communities and families such as population density, age distribution, health literacy, housing, community support services and transport

- [Environmental Factors](#)

### Identifying and definitional attributes

**Item type:** Framework Dimension

**METEOR identifier:** 584858

**Description:** Physical, chemical and biological factors such as air, water, food and soil quality resulting from chemical pollution and waste disposal

- [Health Behaviours](#)

### Identifying and definitional attributes

**Item type:** Framework Dimension

**METEOR identifier:** 584854

**Description:** Attitudes, beliefs knowledge and behaviours (e.g. patterns of eating, physical activity, excess alcohol consumption and smoking)

- [Person-related Factors](#)

## Identifying and definitional attributes

|                    |  |
|--------------------|--|
| Item type:         | Framework Dimension  |
| METEOR identifier: | 584851   |
| Description:       | Genetic-related susceptibility to disease and other factors such as blood pressure, cholesterol levels and body weight |

- [Socioeconomic Factors](#)

## Identifying and definitional attributes

|                    |   |
|--------------------|---|
| Item type:         | Framework Dimension   |
| METEOR identifier: | 584857  |
| Description:       | Socio-economic factors such as education, employment, per capita expenditure on health, and average weekly earnings |

- [Tier III-Health System Performance](#)

## Identifying and definitional attributes

|                    |  |
|--------------------|--|
| Item type:         | Framework Dimension  |
| METEOR identifier: | 584860   |
| Description:       | How well is the health system performing in delivering quality health actions to improve the health of all Australians? Is it the same for everyone? |

### Sub-dimensions of this framework

- [Accessible](#)

## Identifying and definitional attributes

|                    |   |
|--------------------|---|
| Item type:         | Framework Dimension   |
| METEOR identifier: | 584868  |
| Description:       | Ability of people to obtain health care at the right place and right time irrespective of income, geography and cultural background |
