ABS Australian Health Survey (AHS), 2011-13 (2011-12 Core component)

Identifying and definitional attributes

Item type: Data Source

METEOR identifier: 585476

Description: The 2011-13 Australian Health Survey (AHS) was conducted by the Australian Bureau of Statistics (ABS) from 2011 to 2013. Approximately 25,000 households from all states and territories were included. One adult (aged 18 years or more) and one child (where applicable) for each sampled dwelling were included in the survey. The core component collected information about items such as self-assessed health status, self-assessed body mass, smoking, physical activity and dietary behaviours.
