measured as the number of GP consultations in which chronic conditions were managed by the GP during the consultation per 100 GP consultations.

Indicator set: National Health Performance Authority: Healthy Communities: 2011–

National Health Performance Authority (retired), Retired 01/07/2016

# Collection and usage attributes

Computation description: Customised analysis of BEACH data prepared for the National Health

Performance Authority by the Family Medicine Research Centre, The University of

Sydney, 2009-2013.

Results comprise all chronic conditions managed in general practice.

**Computation:** 100 X (numerator/denominator)

**Numerator:** Number of GP consultations with patients who had one, two, or three or more

chronic health conditions managed during the data period. Results comprise all chronic conditions managed in general practice. Results are measured as the number of GP consultations where chronic conditions were managed by the GP

during the consultation.

Numerator data elements: Data Element / Data Set

Person—type of chronic medical condition, common condition code N[N]

**Data Source** 

Bettering the Evaluation and Care of Health (BEACH)

Data Element / Data Set

Person—chronic condition managed in General Practice indicator, yes/no code N

**Data Source** 

Bettering the Evaluation and Care of Health (BEACH)

**Denominator:** The BEACH encounter data was collected from April 2009 to March 2013 from

3,903 participating GPs providing 390,300 patient encounters.

Denominator data

elements:

-Data Element / Data Set-

Service event—General Practitioner (GP) service, total number NN[N]

**Disaggregation:** By Medicare Local catchment peer group and Medicare Local catchment.

Disaggregation data

elements:

Data Element / Data Set

Administrative health region—Medicare Local peer group, code N
