# Indigenous primary health care: Pl01a-Number of Indigenous babies born within the previous 12 months whose birth weight has been recorded, 2015

## Identifying and definitional attributes

Metadata item type: Indicator

**Indicator type:** Output measure

**Short name:** Pl01a-Number of Indigenous babies born within the previous 12 months whose

birth weight has been recorded, 2015

METEOR identifier: 587703

**Registration status:** Health, Superseded 05/10/2016

Indigenous, Superseded 20/01/2017

**Description:** Number of Indigenous babies born within the previous 12 months whose birth

weight has been recorded at the primary health care service.

Rationale: Low birth weight (newborn babies weighing less than 2,500 grams) is associated

with an increased risk of ill health and is related to higher mortality within the first

year of life. Low birth weight is a particular issue for Indigenous

Australians. Recording birth weight encourages the provision of appropriate care

to limit the negative associations of low birth weight.

Indicator set: Indigenous primary health care key performance indicators (2015)

<u>Health</u>, Superseded 05/10/2016 <u>Indigenous</u>, Superseded 20/01/2017

### Collection and usage attributes

Computation description: Count of Indigenous babies born within the previous 12 months whose birth weight

has been recorded at the primary health care service.

Birth weight is defined as the first weight of a baby obtained after birth.

Only live births are included.

Results arising from measurements conducted outside of the service, that are

known by the service, are included in the calculation of this indicator.

Presented as a number.

'Previous 12 months' refers to the previous financial year or previous calendar year.

**Computation:** Numerator only.

**Numerator:** Number of Indigenous babies born within the previous 12 months whose birth

weight has been recorded at the primary health care service.

#### Numerator data elements:

Data Element / Data Set

Birth—birth status, code N

**Data Source** 

Indigenous primary health care data collection

NMDS / DSS

Indigenous primary health care DSS 2015-17

Guide for use

Only live births are included.

#### Data Element / Data Set-

Person—Indigenous status, code N

**Data Source** 

Indigenous primary health care data collection

NMDS / DSS

Indigenous primary health care DSS 2015-17

Guide for use

The baby is considered Indigenous if one or both parents identify as Indigenous.

#### Data Element / Data Set-

Person—birth weight recorded indicator, yes/no code N

Data Source

Indigenous primary health care data collection

NMDS / DSS

Indigenous primary health care DSS 2015-17
