## Data element attributes

#### Collection and usage attributes

**Guide for use:** The maximum hours may be less than or equal to the opening hours of the service

but may exceed the number of hours the child is enrolled for or hours attended at

the service in the reference period.

Non-instructional times such as recess, tea breaks and lunch breaks should be included if the child was under the supervision of the service provider organisation.

Collection methods: The maximum number of hours should be collected for each early childhood

education program available at the service. These data should then be used to determine and report the maximum program length at the service provider level.

Jurisdictions which adopt a two week reference period are required to derive their

data to a representative reference week.

**Comments:** This data element provides information on the proportion of children that are

enrolled in early childhood education programs that are available for at least 15

hours per week or at least 600 hours per year.
