Definition: The National Centre for Classification in Health classification of diseases and

related health problems.

Classification structure: ICD-10-AM is comprised of:

 Tabular List of Diseases - contains core three character codes with some expansion to four and five character codes. Two appendices are specified: Morphology of neoplasms; and Special tabulation lists for mortality and morbidity.

Alphabetic Index of Diseases - consists of three sections: Section I is the
index of diseases, syndromes, pathological conditions, injuries, signs,
symptoms, problems and other reasons for contact with health services.
Section II is the index of external causes of injury. The terms included here are
not medical diagnoses but descriptions of the circumstances in which the
violence occurred. Section III is the index of drugs and other chemical
substances giving rise to poisoning or other adverse effects (also known as
the Table of drugs and chemicals).
