Emergency service stay—triage category, code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Emergency service stay triage category
METEOR identifier:	645869
Registration status:	Health , Superseded 25/01/2018
Definition:	The urgency of the patient's need for medical and nursing care as assessed at triage , as represented by a code.
Context:	Emergency service care.
Data Element Concept:	Emergency service stay—triage category
Value Domain:	Triage category code N

Value domain attributes

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Resuscitation: immediate (within seconds)
	2	Emergency: within 10 minutes
	3	Urgent: within 30 minutes
	4	Semi-urgent: within 60 minutes
	5	Non-urgent: within 120 minutes

Data element attributes

Collection and usage attributes

Collection methods:	<p>This triage classification is to be used in the emergency services of hospitals. Patients will be triaged into one of five categories on the Australasian Triage Scale according to the triageur's response to the question: 'This patient should wait for medical care no longer than ...?'. The triage category is allocated by an experienced registered nurse or medical practitioner. If the triage category changes, both triage categories can be captured, but the original category must be reported in this data element. A triage category should not be assigned for patients if Emergency service stay—type of visit to emergency service, code N is coded 5 (i.e. Dead on arrival).</p>
