Person—intercountry adoption order type, code N

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Intercountry adoption order type

METEOR identifier: 651107

Registration status: Children and Families, Superseded 03/11/2021

Definition: The type of arrangement under which an adopted person enters Australia, as

represented by a code.

 Data Element Concept:
 Person—intercountry adoption order type

 Value Domain:
 Intercountry adoption order type code N

Value domain attributes

Representational attributes

Representation class: Code

Data type: Number

Format: N

Maximum character length: 1

Value Meaning

Permissible values: 1 Full adoption order in the country of origin

2 Guardianship order

Supplementary values: 9 Not stated/inadequately described

Collection and usage attributes

Guide for use: CODE 1 Full adoption order in the country of origin

An adoption made in the child's country of origin is a full adoption if the order that is made creates (between the child and the adoptive parent(s)) the relationships of parent and child, and severs the relationship between the child and the biological

parent(s).

CODE 2 Guardianship order

A guardianship order is a simple adoption order made in the child's country of origin that creates a custodial relationship between the adoptive parent(s) and the child, but does not create the relationship of parent and child. In these cases, the parent/child link between the biological parent and the child is not severed. The child enters Australia under a guardianship order, and the full adoption order must

be made in Australia.
