# Episode of admitted patient care—major diagnostic category, code (AR-DRG v 8.0) NN

# Identifying and definitional attributes

Metadata item type: Data Element

**Short name:** Major diagnostic category

METEOR identifier: 653337

Registration status: Tasmanian Health, Superseded 12/01/2018

**Definition:** The category into which the patient's diagnosis and the associated Australian

refined diagnosis related group (ARDG) falls, as represented by a code.

Data Element Concept: Episode of admitted patient care—major diagnostic category

Value Domain: Major diagnostic category code (AR-DRG v 8.0) NN

## Value domain attributes

## Representational attributes

Classification scheme: Australian Refined Diagnosis Related Groups version 8.0

Representation class: Code

Data type: String

Format: NN

Maximum character length: 2

## Data element attributes

## Collection and usage attributes

**Comments:** This metadata item has been created to reflect the development of Australian

refined diagnosis related groups (AR-DRGs) (as defined in the metadata item Episode of admitted patient care—diagnosis related group, code (AR-DRG v 8.0) ANNA) by the Commonwealth Department of Health. Due to the modifications in the diagnosis related group logic for the AR-DRGs, it is necessary to generate the major diagnostic category to accompany each diagnosis related group. The construction of the pre-major diagnostic category logic means diagnosis related groups are no longer unique. Certain pre-major diagnostic category diagnosis related groups may occur in more than one of the 23 major diagnostic categories.
