Emergency department stay—physical departure date, DDMMYYYY

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Emergency department physical departure date
METEOR identifier:	684489
Registration status:	<u>Health</u> , Superseded 20/10/2021 <u>Tasmanian Health</u> , Superseded 22/03/2023
Definition:	The date on which a patient departs an <u>emergency department</u> after a stay, expressed as DDMMYYYY.
Context:	Emergency department care.
Data Element Concept:	Emergency department stay—physical departure date
Value Domain:	Date DDMMYYYY

Value domain attributes

Representational attributes

Representation class:	Date
Data type:	Date/Time
Format:	DDMMYYYY
Maximum character length:	8

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

The episode end status should guide the selection of the value to be recorded in this field:

- If the patient is subsequently admitted to this hospital (either short stay unit, hospital-in-the-home or non-emergency department hospital ward), then record the date the patient leaves the emergency department to go to the admitted patient facility.
 - Patients admitted to any other ward or bed within the emergency department have not physically departed the emergency department until they leave the emergency department.
 - If the patient is admitted and subsequently dies before leaving the emergency department, then record the date the body was removed from the emergency department.
- If the service episode is completed without the patient being admitted, then record the date the patient's emergency department non-admitted clinical care ended.
- If the service episode is completed and the patient is referred to another hospital for admission, then record the date the patient leaves the emergency department.
- If the patient did not wait, then record the date the patient leaves the emergency department or was first noticed as having left.
- If the patient leaves at their own risk, then record the date the patient leaves the emergency department or was first noticed as having left.
- If the patient died in the emergency department, then record the date the body was removed from the emergency department.
- If the patient was dead on arrival, then record the date the body was removed from the emergency department. If an emergency department physician certified the death of the patient outside the emergency department, then record the date the patient was certified dead.
- If the patient was registered, advised of another health-care service, and left the emergency department without being attended by a health-care professional, then record the date the patient leaves the emergency department.

Collection methods:Collected in conjunction with emergency department physical departure time.Comments:This data element has been developed for the purpose of State and Territory
compliance with the National Healthcare Agreement and the agreed national
access performance indicator.
