Allied health non-individual patient attributable activity—activity date

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	705558
Registration status:	Health, Standard 12/12/2018
Definition:	The date allied health non-individual patient attributable activity occurred.
Context:	Non-individual patient attributable activity
	Allied health care

Object Class attributes

Identifying and definitional attributes

Object class:	Allied health non-individual patient attributable activity
METEOR identifier:	705535
Registration status:	Health, Standard 12/12/2018
Definition:	Any clinical care activity performed by an allied health service provider that contributes to clinical care but cannot be assigned to an individual patient.

Collection and usage attributes

Guide for use:	Allied health non-individual patient attributable activity will be counted using various parameters. The sum total of allied health non-individual patient attributable activity for each allied health service provider is limited to a single day duration i.e. maximum of 1,440 minutes.
Comments:	An allied health non-individual patient attributable activity is performed by an allied health service provider within the professions identified in Allied health service event—provider profession, code AA[AAA]
	NIPA is any clinical care activity undertaken by an allied health professional, assistant or student that contributes to clinical care (activities which provide a service to an individual, group or community to influence health status) but cannot be assigned to an individual patient.
	For example:
	Delivery of a group programme too large to allocate time to patients individually; where the identity of the patient(s) cannot be determined or the overhead to determine is excessive; case meetings, case consultations and ward rounds where it is not practicable to assign time to patients individually; planning for a group treatment programme; design, preparation and implementation of clinical/education products after concept approval obtained; health promotion targeting a large group/population; travel related to any of the above.
