Registration status:	Health , Standard 07/12/2011 Independent Hospital Pricing Authority , Qualified 23/11/2015 National Health Performance Authority (retired) , Retired 01/07/2016
Definition:	A combination of alphanumeric characters.

Representational attributes

Representation class:	Text
Data type:	String
Format:	XXX[X(97)]
Maximum character length:	100

Data element attributes

Collection and usage attributes

Guide for use:

For the ambulatory service setting, the service unit is equivalent to an organisation's ambulatory services as a whole. However, ambulatory service units should be differentiated by target population. Where an organisation provides multiple teams serving the same target population, these may be grouped and reported as a single service unit, or identified as individual service units in their own right. Ambulatory services would be separately identifiable as service units using the [Specialised mental health service—target population group, code N](#) data element. For additional information, refer to the glossary item [Ambulatory mental health care service](#). The Ambulatory service unit name should be unique for the service unit in that state/territory. Service unit reporting structures should be identical between all mental health collections (e.g., Mental Health National Minimum Data Sets and the Mental Health National Outcomes and Casemix Collection (NOCC)).
