# Timing of fetal death code N

## Identifying and definitional attributes

Metadata item type: Value Domain

METEOR identifier: 716361

**Registration status:** <u>Health,</u> Standard 17/12/2021

**Definition:** A code set representing the timing of a <u>fetal death</u> in relation to labour.

### Representational attributes

Representation class: Code

Data type: Number

Format: N

Maximum character length: 1

ValueMeaningPermissible values:1Intrapartum2Antepartum

3 Unknown

**Supplementary values:** 9 Not stated/inadequately described

# Collection and usage attributes

Guide for use: CODE 1 Intrapartum

Use this code when the fetal death is known to have occurred during labour or the

birth.

CODE 2 Antepartum

Use this code when the fetal death is known to have occurred prior to the onset of

labour.

CODE 3 Unknown

Use this code when it is unknown or not possible to determine whether the fetal

death occurred intrapartum or antepartum.

CODE 9 Not stated/inadequately described

Use this code when the timing of the fetal death is not stated or inadequately described. It is not intended for use on primary collection instruments.
