Person—level of functional independence, Functional Independence Measure score code N

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Level of functional independence (FIM™ score)

METEOR identifier: 717982

Registration status: Health, Standard 18/12/2019

Tasmanian Health, Standard 06/05/2020

Definition: A person's level of functional independence to carry out activities of daily living

safely and autonomously, as represented by a Functional Independence

Measure score-based code.

Data Element Concept: Person—level of functional independence

Value Domain: Functional Independence Measure score code N

Value domain attributes

Representational attributes

Representation class: Code

Data type: Number

Format: N

Maximum character length: 1

	Value	Meaning
Permissible values:	1	Total assistance with helper
	2	Maximal assistance with helper
	3	Moderate assistance with helper
	4	Minimal assistance with helper
	5	Supervision or setup with helper
	6	Modified independence with no helper
	7	Complete independence with no helper
Supplementary values:	9	Not stated/inadequately described

Collection and usage attributes

Guide for use:

The Functional Independence Measure (FIM™) is an instrument which indicates a patient's disability level.

FIM™ is comprised of 18 items, grouped into 2 subscales - motor and cognition.

The motor subscale includes:

- Eating
- Grooming
- Bathing
- · Dressing, upper body
- Dressing, lower body
- Toileting
- Bladder management
- Bowel management
- Transfers bed/chair/wheelchair
- Transfers toilet
- Transfers bath/shower
- Walk/wheelchair
- Stairs

The cognition subscale includes:

- Comprehension
- Expression
- Social interaction
- Problem solving
- Memory

Each item is scored on a 7 point ordinal scale, ranging from a score of 1 to a score of 7. The higher the score, the more independent the patient is in performing the task associated with that item.

CODE 9 Not stated/inadequately described

This code should be used in circumstances where the FIM score code has not been collected. This code is not to be used on FIM score data collection forms.

Submitting organisation: Independent Hospital Pricing Authority

Data element attributes

Collection and usage attributes

Guide for use: This data element is used to report a score for one of the 18 items that comprise

> the Functional Independence Measure instrument. It should be reported in an array of 18 to gain a full (FIMTM) score. The total (FIMTM) score ranges from 18 to 126. If

a response to a question within the score contains a value of 9 (not

stated/inadequately described), this should not be included in the calculation of the

total (FIMTM) score.
