Acute coronary syndromes clinical care standard indicators: 2a-Proportion of patients with symptoms suggestive of acute coronary syndrome (ACS) with an electrocardiogram (ECG) performed and interpreted within 10 minutes of first clinical contact, 2019-

Identifying and definitional attributes

Metadata item type: Indicator Indicator type: Indicator

Short name: Indicator 2a- Proportion of patients with an ECG performed and interpreted within

10 minutes of first clinical contact

METEOR identifier: 719385

Registration status: Australian Commission on Safety and Quality in Health Care, Qualified 17/09/2019

Description: Proportion of patients with acute chest pain or other symptoms suggestive of <u>acute</u>

coronary syndrome (ACS), with an 12-lead electrocardiogram (ECG) performed

and interpreted before or within 10 minutes of first clinical contact.

Indicator set: Clinical care standard indicators; acute coronary syndromes

Australian Commission on Safety and Quality in Health Care, Standard

29/10/2020

Collection and usage attributes

Computation description: Both the numerator and denominator include patients with acute chest pain or other

symptoms suggestive of ACS.

'First clinical contact' is defined as the time that emergency medical services personnel arrive at the patient or presentation time at the emergency department.

Presented as a percentage.

Computation: (Numerator ÷ denominator) x 100

Numerator: Number of patients with acute chest pain or other symptoms suggestive of ACS

with 12-lead ECG performed and interpreted before or within 10 minutes of first

clinical contact.

Denominator: Number of patients presenting to ED, including via ambulance, with acute chest

pain or other symptoms suggestive of ACS.

Comments: It is common practice for clinicians to sign ECGs on review with date and time of

review.

Representational attributes

Representation class: Percentage

Data type: Real

Unit of measure: Service event

Format: N[NN]
