Specialised mental health service—ambulatory service unit identifier, XXXXXX

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Ambulatory mental health service unit identifier
METEOR identifier:	724354
Registration status:	Health , Superseded 17/12/2021
Definition:	A unique identifier for a specialised mental health ambulatory service unit, as represented by a combination of numeric and/or alphabetic characters.
Data Element Concept:	Specialised mental health service—ambulatory service unit identifier
Value Domain:	Identifier XXXXXX

Value domain attributes

Representational attributes

Representation class:	Identifier
Data type:	String
Format:	XXXXXX
Maximum character length:	6

Data element attributes

Collection and usage attributes

Guide for use:	<p>For the ambulatory service setting, the service unit is equivalent to an organisation's ambulatory services as a whole. However, ambulatory service units should be differentiated by target population. Where an organisation provides multiple teams serving the same target population, these may be grouped and reported as a single service unit, or identified as individual service units in their own right. Ambulatory services would be separately identifiable as service units using the Specialised mental health service—target population group, code N data element. For additional information, please refer to the glossary item Ambulatory mental health care service. The complete identifier string, including State/Territory identifier, Region identifier, Organisation identifier, Service unit cluster identifier and Ambulatory service unit identifier, should be a unique code for the service unit in that state/territory. Service unit reporting structures should be identical between all mental health collections (e.g., Mental Health National Minimum Data Sets and the Mental Health National Outcomes and Casemix Collection (NOCC)).</p>
