Indigenous-specific primary health care: Pl01b-Proportion of Indigenous babies born within the previous 12 months who have birthweight recorded, December 2020

Identifying and definitional attributes

Metadata item type: Indicator Indicator type: Indicator

Short name: PI01b-Proportion of Indigenous babies born within the previous 12 months who

have birthweight recorded, December 2020

METEOR identifier: 739299

Registration status: Indigenous, Superseded 03/07/2022

Description: Proportion of Indigenous babies born within the previous 12 months whose

birthweight has been recorded at the primary health-care organisation.

Rationale: Low birthweight (newborn babies weighing less than 2,500 grams) is

associated with an increased risk of ill health and is related to a higher mortality within the first year of life. Low birthweight is a particular issue for Indigenous Australians. Recording birthweight encourages the provision of appropriate care to

limit the negative associations of low birthweight.

Collection and usage attributes

Computation description: Proportion of Indigenous babies born within the previous 12 months whose

birthweight has been recorded at the primary health-care organisation.

Presented as a percentage.

Birthweight is defined as the first weight of a baby obtained after birth.

Only live births are included.

Results arising from measurements conducted outside of the organisation that are

known by the organisation are included in the calculation of this indicator.

'Previous 12 months' refers to the previous financial year or previous calendar year.

Computation: (Numerator ÷ Denominator) x 100

Numerator: Number of Indigenous babies born within the previous 12 months whose

birthweight has been recorded at the primary health-care organisation.

Numerator data elements:

Data Element / Data Set

Person—Indigenous status, code N

Data Source

Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators (nKPI) data collection

NMDS / DSS

Indigenous-specific primary health care NBEDS December 2020

Guide for use

The baby is considered Indigenous if one or both parents identify as Indigenous.

Data Element / Data Set

Product of birth—birth status, code N

Data Source

Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators (nKPI) data collection

NMDS / DSS

Indigenous-specific primary health care NBEDS December 2020

Guide for use

Only live births are included.

Data Element / Data Set

Person—birthweight recorded indicator, yes/no code N

Data Source

Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators (nKPI) data collection

NMDS / DSS

Indigenous-specific primary health care NBEDS December 2020

Denominator:

Total number of Indigenous babies born within the previous 12 months who had a medical record at the primary health-care organisation.

Denominator data elements:

Data Element / Data Set

Person—Indigenous status, code N

Data Source

Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators (nKPI) data collection

NMDS / DSS

Indigenous-specific primary health care NBEDS December 2020

Guide for use

The baby is considered Indigenous if one or both parents identify as Indigenous.
