Specialised mental health service—ambulatory service unit name, text XXX[X(97)]

Exported from METEOR (AIHW's Metadata Online Registry)

Specialised mental health service—ambulatory service unit name, text XXX[X(97)]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Ambulatory mental health service unit name
METEOR identifier:	750374
Registration status:	Health, Standard 17/12/2021
Definition:	The appellation by which a specialised mental health ambulatory service unit is known or called, as represented by text.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Specialised mental health service—ambulatory service unit name
METEOR identifier:	750372
Registration status:	Health, Standard 17/12/2021
Definition:	The appellation by which a specialised mental health ambulatory service unit is known or called.
Object class:	Specialised mental health service
Property:	Ambulatory service unit name

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare

Value domain attributes

Guide for use:

For the ambulatory service setting, the service unit is equivalent to an organisation's ambulatory services as a whole. However, ambulatory service units should be differentiated by target population. Where an organisation provides multiple teams serving the same target population, these may be grouped and reported as a single service unit or identified as individual service units in their own right. Ambulatory services would be separately identifiable as service units using the Specialised mental health service—target population group, code N data element. For additional information, refer to the glossary item **Ambulatory mental health care service**. The Ambulatory service unit name should be unique for the service unit in that state/territory. Service unit reporting structures should be identical between all mental health collections (e.g., Mental Health National Minimum Data Sets and the Mental Health National Outcomes and Casemix Collection (NOCC)).

Conditional obligation:

For use in the National Outcomes and Casemix Collection (NOCC), this data element applies when the service provision setting is **[Ambulatory mental health care service.](#)**

Data must be collected for either this data element or one of [Specialised mental health service—admitted patient service unit name, text XXX[X(97)]](#) or [Specialised mental health service—residential service unit name, text XXX[X(97)].](#)

DSS specific information:

For use in the National Outcomes and Casemix Collection (NOCC), ambulatory service units should be differentiated by target population (general, older persons, child and adolescent, youth, and forensic). Where an organisation provides multiple teams serving the same target population, these may be grouped and reported as a single service unit or identified as individual service units in their own right. Where possible, it is also desirable that residential service units identified in NOCC data correspond directly on a one-to-one basis to those reported in the [Community mental health care NMDS 2023–24](#).
