Indigenous-specific primary health care: PI18b-Proportion of Indigenous regular clients with a selected chronic disease who have a kidney function test result recorded, December 2021

Identifying and definitional attributes

Metadata item type: Indicator Indicator type: Indicator

Short name: Pl18b-Proportion of Indigenous regular clients with a selected chronic disease who

have a kidney function test result recorded, December 2021

METEOR identifier: 762659

Registration status: <u>Indigenous,</u> Superseded 12/06/2023

Description: Proportion of <u>Indigenous regular clients</u> with a selected chronic disease who

had a specified kidney function test recorded.

Indigenous-specific primary health care national key performance indicators

December 2021

Indigenous, Superseded 12/06/2023

Collection and usage attributes

Computation description: Proportion of <u>Indigenous regular clients</u> with:

• type 2 diabetes

cardiovascular disease (CVD)

• type 2 diabetes and/or CVD

who had:

- both an estimated glomerular filtration rate (eGFR) AND an albumin/creatinine ratio (ACR) test result recorded
- only an eGFR test result recordedonly an ACR test result recorded
- neither an eGFR nor an ACR test result recorded

within the previous 12 months.

Presented as a percentage.

Calculated separately for the specified chronic disease and test recorded categories.

Type 2 diabetes AND/OR CVD: in this category, count clients with either or both of these conditions once only. For example, count a client with both type 2 diabetes

and CVD once, not twice.

Computation: (Numerator ÷ Denominator) x 100

Numerator:

Calculation A: Number of Indigenous regular clients with type 2 diabetes who had both an eGFR AND an ACR test result recorded within the previous 12 months.

Calculation B: Number of Indigenous regular clients with type 2 diabetes who had only an eGFR test result recorded within the previous 12 months.

Calculation C: Number of Indigenous regular clients with type 2 diabetes who had only an ACR test result recorded within the previous 12 months.

Calculation D: Number of Indigenous regular clients with type 2 diabetes who had neither an eGFR NOR an ACR test result recorded within the previous 12 months.

Calculation E: Number of Indigenous regular clients with CVD who had both an eGFR AND an ACR test result recorded within the previous 12 months.

Calculation F: Number of Indigenous regular clients with CVD who had only an eGFR test result recorded within the previous 12 months.

Calculation G: Number of Indigenous regular clients with CVD who had only an ACR test result recorded within the previous 12 months.

Calculation H: Number of Indigenous regular clients with CVD who had neither an eGFR NOR an ACR test result recorded within the previous 12 months.

Calculation I: Number of Indigenous regular clients with type 2 diabetes AND/OR CVD who had both an eGFR AND an ACR test result recorded within the previous 12 months.

Calculation J: Number of Indigenous regular clients with type 2 diabetes AND/OR CVD who had only an eGFR test result recorded within the previous 12 months.

Calculation K: Number of Indigenous regular clients with type 2 diabetes AND/OR CVD who had only an ACR test result recorded within the previous 12 months.

Calculation L: Number of Indigenous regular clients with type 2 diabetes AND/OR CVD who had neither an eGFR NOR an ACR test result recorded within the previous 12 months.

Numerator data elements:

Data Element / Data Set-

Person—diabetes mellitus status, code NN

Data Source

Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators (nKPI) data collection
