
Unique agency identifier

Important note: This is an archived metadata standard from the AIHW Knowledgebase. For current metadata standards and related information please access METeOR, the AIHW's Metadata Online Registry at <http://meteor.aihw.gov.au>

Identifying and Definitional Attributes

Data Dictionary: NCSDD
Knowledgebase ID: 000541 Version number: 1
Metadata type: DATA ELEMENT CONCEPT
Admin status: SUPERSEDED Effective date: 01-JUL-98
Definition: The unique identifier for the establishment in which the episode or care or the service event occurred
Context: This element identifies the agency in which the provision of the service event occurred.

Relational and Representational Attributes

Datatype:
Collection Methods: Currently, there is no uniform method throughout community services for the identification of agencies. However, adoption of consistent practices for allocating unique agency identifiers has the potential to enhance data comparability and utility.
Related metadata: has been superseded by Agency identifier version 2

Administrative Attributes

Source Document: National Health Data Dictionary
Source Organisation: National Health Data Committee
Comments: It is important to note that if agencies are to communicate confidentially between one another, a unique agency identity needs to be established. The use of this item will lead to reduced duplication in reporting patient activity and will enable linkage of services to one episode of care or service event. Used for quality assurance and auditing of data reported as contracted service.
Was ID. 000041 (500 added to avoid NHDD DE with same ID.).
