Permissible values - Value Domain

The following information is applicable to value domains only.

Definition

A list of codes and code descriptions representing values specified on a primary collection form.

Obligation

Conditional completion: complete for value domains of representation class Code.

Development rules

List each permissible value on a new line within the left-most column, without the use of a semi-colon, comma or full stop.

For each permissible value, provide a concise description in the corresponding right-hand column.

Expressly exclude or include a specific value from a permissible value by:

- Stating the name of that value in alphabetic characters within the description column.
- Enclosing this text within parentheses.

For example, Drowning, submersion - other than swimming pool (excludes drowning associated with water craft).
