

Data element concept

The following information is applicable to data elements only.

Definition

The data element concept implemented in this data element.

Obligation

Mandatory completion

Development rules

Only one data element concept may be selected.

A data element concept must be selected before a data element will be accepted by the Registrar.

To add a data element concept:

1. Click the *Add...* button. This will open a Data Element Concept browser window.
2. You are able to view all data element concepts within METeOR by either property or in an alphabetic list.
3. Scroll through the list to find the relevant data element concept and then select *OK*.
4. Your selected data element concept will now be listed in the create new data element window.
