

Data elements/DSS'

The following information is applicable to data set specifications (DSS) only.

Definition

A list of the metadata items (either data elements of data set specifications) which are included this data set specification.

Obligation

Mandatory completion: a data set specification must include two metadata items.

Development rules

To assign metadata items to the DSS:

1. Click the *Add...* button. This will generate the text fields to enter the new metadata item's required details.
