

# Browse

To find the metadata item you wish to add, press the *Browse...* button. This will open the *Data element/DSS browser* window. You are able to view all the data elements listed according to data element concept, value domain or in an alphabetic list. Data set specifications are listed alphabetically. Scroll through the list to find the relevant data element or data set specification and then select *OK*. Your selected item will now be listed.

To add another metadata item, press the *Add* button.
