Injury event—human intent of injury, code NN

Exported from METEOR (AIHW's Metadata Online Registry)

Injury event—human intent of injury, code NN

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	External cause—human intent
METEOR identifier:	268944
Registration status:	Health, Standard 01/03/2005
Definition:	The clinician's assessment identifying the most likely role of human intent in the occurrence of the injury or poisoning, as represented by a code.
Data Element Concept:	Injury event—human intent of injury
Value Domain:	Human intent in injury code NN

Value domain attributes

Representational attributes

Representation class:	Code	
Data type:	String	
Format:	NN	
Maximum character length:	2	
	Value	**Meaning**
Permissible values:	01	Accident - injury not intended
	02	Intentional self-harm
	03	Sexual assault
	04	Maltreatment by parent
	05	Maltreatment by spouse or partner
	06	Other and unspecified assault
	07	Event of undetermined intent
	08	Legal intervention (including police) or operations of war
	09	Adverse effect or complications of medical and surgical care
	10	Other specified intent
	11	Intent not specified

Collection and usage attributes

Guide for use:	Select the code which best characterises the role of intent in the occurrence of the injury, on the basis of the information available at the time it is recorded. If two or more categories are judged to be equally appropriate, select the one that comes first in the code list. This metadata item must always be accompanied by an Injury event—external cause, non-admitted patient human intent code NN code. This Value domain is for use in injury surveillance purposes only, when it is not possible to use a complete ICD-10-AM code (e.g. non-admitted patients in emergency departments).

Data element attributes

Collection and usage attributes

Comments:
Enables categorisation of injury and poisoning according to factors important for injury control. This information is necessary for defining and monitoring injury control targets, injury costing and identifying cases for in-depth research.
