Diagnosis related group

Identifying and definitional attributes

Metadata item type:	Property
METEOR identifier:	269188
Registration status:	Health , Standard 01/03/2005 Tasmanian Health , Standard 06/09/2016
Definition:	A resource utilisation classification based on diagnosed conditions, usage of hospital resources, and demographic characteristics of the patient.
Context:	The development of Australian refined diagnosis related groups has created a descriptive framework for studying hospitalisation. Diagnosis related groups provide a summary of the varied reasons for hospitalisation and the complexity of cases a hospital treats. Moreover, as a framework for describing the products of a hospital (that is, patients receiving services), they allow meaningful comparisons of hospitals' efficiency and effectiveness under alternative systems of health care provision.
Property group:	Service provision event

Relational attributes

Data Element Concepts implementing this property:	Episode of admitted patient care—diagnosis related group Health , Standard 01/03/2005 Tasmanian Health , Standard 06/09/2016
