Episode of admitted patient care—referral destination

Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 269430

Registration status: Health, Standard 01/03/2005

Definition: Referral to further care by health service agencies/facilities.

Context: Mental health care:

Many psychiatric inpatients have continuing needs for post-discharge care. Continuity of care across the hospital-community interface is a key policy theme emerging in the various states and territories. Inclusion of this metadata item allows the opportunity to monitor interagency linkages and is complementary to the

metadata item the source of referral.

Object Class attributes

Identifying and definitional attributes

Object class: Episode of admitted patient care

Definition: The period of admitted patient care between a formal or statistical <u>admission</u> and

a formal or statistical **separation**, characterised by only one care type.

Context: Admitted patient care.

Specialisation of: Service episode

Collection and usage attributes

Guide for use: This treatment and/or care provided to a patient during an episode of care can

occur in hospital and/or in the person's home (for hospital-in-the-home patients).
