

Elective care waiting list episode—elective care type

Metadata item type: Data Element Concept
METEOR identifier: 269432
Registration status:

- [Health](#), Standard 01/03/2005

Definition: The type of elective hospital care that a patient requires.

Context: Admitted patients:

Hospitals maintain waiting lists which may include patients awaiting hospital care other than elective surgery - for example, dental surgery and oncology treatments.

This metadata item is necessary to distinguish patients awaiting elective surgery from those awaiting other types of elective hospital care. The waiting period for patients awaiting transplant or obstetric procedures is largely independent of system resource factors.

Object Class attributes

Identifying and definitional attributes

Object class: [Elective care waiting list episode](#)

Definition: The period between entry to and removal from an elective care waiting list.

Specialisation of: [Service episode](#)

Source and reference attributes

Submitting organisation: Australia Institute of Health and Welfare
