Referral—referral receipt date

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	269445
Registration status:	Community Services (retired) , Standard 01/03/2005 Health , Recorded 13/05/2008 Tasmanian Health , Standard 23/11/2016
Definition:	The date on which an agency receives a client referral from another party.
Context:	Many providers collect the date of referral because it has administrative importance. It can be used in the calculation of response times and for performance indicators that measure the provision of service. Can also be used to measure work-load (i.e. the number of referrals coming to a particular agency). This may be measured for particular clients or particular types of services.

Object Class attributes

Identifying and definitional attributes

Object class:	Referral
Definition:	A recommendation for further care or services.
Specialisation of:	Service/care event
