Elective surgery waiting list episode—clinical urgency

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	269481
Registration status:	Health , Superseded 12/06/2015 National Health Performance Authority (retired) , Retired 01/07/2016
Definition:	A clinical assessment of the urgency with which a patient requires elective hospital care.
Context:	Elective surgery: Categorisation of waiting list patients by clinical urgency assists hospital management and clinicians in the prioritisation of their workloads. It gives health consumers a reasonable estimate of the maximum time they should expect to wait for care. Clinical urgency classification allows a meaningful measure of system performance to be calculated, namely the number or proportion of patients who wait for times in excess of the maximum desirable time limit for their urgency category (metadata item the overdue patient status).

Object Class attributes

Identifying and definitional attributes

Object class:	Elective surgery waiting list episode
Definition:	The period between entry to and removal from an elective surgery waiting list.
Specialisation of:	Service episode
